R1K	yes	Homework for 4 people (2 in college), music internet research, games	No	Depends - don't know realistic costs	Yes	Yes, but only if the company provides the TV	Yes	I like the idea of joining with other towns and having power in numbers over our own system versus being held hostage by big corporations that make decisions in their favor, not our best interest.	No, I realize there could be a cost savings by bundling telephone and satellite TV	No, almost none	4 cell phone users currently	
R2U	Yes	Work, Childs education, research products going to buy, news, and weather	No	I pay \$100/month for slow satellite. I would be willing to pay at least that for high speed broadband where I can actually work and download.	Yes, we use it to communicate with doctors, get test results	Yes this is why we want options	You can but well aware	The limited provider - Verizon. We are unable to get DSL because they are at capacity slowness. We need to be able to download at a quick speed as my child needs it to do homework and religious school activities.	Not at all. I feel it would help the town. No one will move here if no internet. Internet is the way of life. You have to do more online and less paper. Taxes will go up if people move away.	No - no reception	No reception - N/A	
R3U	Yes	Job searches	Yes	\$0	No	Yes	Yes/No	I pay my own bills. I don't feel any resident should have to pay for my internet/phones, etc!	Yes	Yes	100%	
R4U	No	Nothing	No need	None	No	no answer	no answer	Don't see a need for it.	Yes	Do not have	no answer	
R5K	yes	Yes to all	Yes	\$50/month	Yes	Yes	Yes	Don't want bundled services; keep services unbundled	It depends on the deal	It's OK	Minimal, if any	
R6U	Yes	Movies, music, internet	no	\$30-\$60 depending on GB	Yes	Yes	Yes	My biggest concern is not being able to sell my home because many people require or need high speed.	No	No	~4GB	
R7K	Yes	Internet, work, purchases, and play. At times it is frustrating...our son is not a fan of the slow connections.	For me. Yes. Spouse no...his work relies on good connection.	Not sure...I have no clue what it costs	Yes, I work in home health care	Yes	Yes	no concerns. It is needed to bring us into the 21st century.	As long as it is not excessive	According to our son. No. I do not own a cell phone for personal use.	My cell and spouse's cell are work phones only and not used at home. I have tried to call work in springfield using the phone and it searches in sea town.	
R8U	Yes	Streaming movies, music, internet, security system, financial, and educational	No! No! no@ Unable to do educational webinars to maintain my anesthesia licensure.	Whatever it takes. Cost will not be an issue. If you want a \$ value, \$500/month.	Yes. This and more. The internet is rapidly becoming an indispensable for all aspects of daily living.	Yes	Whatever is necessary to drive home the importance of having access to high speed internet	no answer	Not at all	Good...not great	Unlimited data/Approx 50GB/month	
R9U	Yes	Email, websites, Google, facebook, patient portals	Yes	Not much	Possibly	somewhat	yes	no answer	If everyone was charged the same amount - not according to house value	Most of the time	Inexpensive phone - so mostly texts	

	Currently use Internet?	Use the internet for?	Current internet speed acceptable?	Max amt would pay for faster service	Want to connect with healthcare providers through internet? Data usage on your cell phone	Other comments
R10U	Yes	Work and child's education	Not at all	There is no limit to what I would pay	Of course! I currently use online health management to communicate with my doctors	Of course! Who doesn't?	No need to educate - just get it!	My major concern is a lack of any provider. Verizon won't take customers, cell service is not available, and satellit is only 8kbs download so it can't download my child's homework efficiently.	I gladly welcome it. Without quality internet to meet the needs of society, no one will move here, resulting in increased taxes anyway.	Not at all	See question 10	
R11U	Yes	For my business and personal stuff - Google searches, videos, conferences, and email	Right now, I think so, but I'm starting to detect slowness at times.	Anything. I'll have to move out of town if we can't get it together to get high speed internet - no exaggeration!	Yes and Yes	Yes	Yes, we need to bring more people in town along	I'm much more concerned about residents in town who don't understand the importance of this issue.	No, I would not be opposed. If we can't get high speed property values will go down and people will move out/not move in.	Pretty good now with Android phone and Verizon. Earlier in 2015, Iphone 5 and Verizon usually did not work.	Not much. I'm a minimalist cell phone user.	
R12K	Yes	All of those functions - also use for work	Barely - but could be improved significantly.	Around \$50/month	Do not have a need now. Not a pressing concern. Could be beneficial in the future.	Yes	Yes	We are concerned that after considerable investment and commitment to fiber a new technology may emerge that makes our fiber program appear foolhardy and wasteful.	No	Fair	2 Cell phones in household. One cell phone no data. Onee cell phone 1GB/month	
R13U	Yes	Streaming movies ar	Yes	no answer	Yes	Yes	Yes	taxes and fees	likely	no answer	Minimal	
R14U	Yes	Work, full time	No!	\$100/month	Yes	Yes	Yes	I have concerns that all alternatives will not be considered and fully vetted. Wired West is not the only option.	No!	No! Verizon and AT&T cell phones are not reliable.	3GB - not enough	Please consider having emails go out to notify interested parties about your activities
R15U	Yes	Work, shopping	no	<\$100	Yes	yes	yes	underground	within reason	no	under my cap	
R16U	Not much	internet	yes	w/phone and streaming	no answer	yes	yes	?	yes	yes	Don't use data	
R17U	yes	yes	yes	<\$75	no	yes	yes	no answer	yes	yes	none	
R18U	Yes	internet	yes	no answer	yes	yes	yes	no answer	no	reasonable	?	
R19U	Yes	internet, streaming o	most of the time	about the same as now	yes and yes	yes	yes	no answer	No - if minor and if "fair" (per house not per house value)	no - spotty	? Used 1 time or so weekly	
R20U	Yes, DSL	research and homeschool	Never - 9 people and 20 devices!	\$60-\$75/month	yes	Yes and you won't need cable TV!	not necessary I already want it.	none	How much?	sometimes - not usually	1 GB- I mostly use wi-fi on DSL	
R21U	Yes	Streaming movies, music and internet	no	\$40/month	no	yes	yes	we want it	I would agree	Yes	The minimum - we just use them as phones and text	
R22U	Yes	internet	yes	Nothing. I'm happy with the internet I have now.	No	I like what I have now.	No	My internet is fast enough.	Very much opposed.	Yes	24/7 I'm on emergency call and personal business with no problems for the past 30 years	

	Currently use Internet?	Use the internet for?	Current internet speed acceptable?	Max amt would pay for faster service	Want to connect with healthcare providers through internet?	Aware you can save money with better service?	Interest in informational sessions about Broadband?	Concerns about high speed broadband providers	Opposed to tax increase?	Good cell reception currently?	Data usage on your cell phone	Other comments
R23U	Yes	All the above and some online purchases - Amazon and schooling (child in college)	Yes - no complaints	\$30.00 that is what we pay now, would pay a bit more if speed was much faster but no more than \$50.00/month.	not at all	Yes, but I already have these options, I am not aware of live TV on the web, 22 news, channel 40, ect, local channels	No. I see no options for under \$30/month available.	I have concerns with only new company trying to provide service like the big players like Verizon, Comcast, etc. I don't think the town of Montgomery should run an internet service or own any part of it. This town can barely run what we have now.	Very much so. There is no way I would pay a tax increase for this service and I would deduct it from my bill.	Fair, but my landline has only failed me once in 8 years due to an ice storm.	not sure.	
R24U	Yes	Internet	Yes	\$40	no answer	Don't need this	no answer	no answer	Yes	Fair	100 min/month, no data	
R25U	Yes	All - uploading files and pictures, website design/maintenance, and skyping	No!	\$50 for average HS, \$75 for faster	yes	Wish we had it. We use movies/TV over the internet	Yes	Please make sure we don't get price gouged by a huge provider. Also hate "intro" rates that skyrocket later. Would rather \$ go to town than corporation who holds us hostage.	No!	No - can only text from house can't call or use data	Can only text from house.
